- **Notes:**

1. A manager ***suspension*** means that the manager is not allowed at the facility where the game is being played and violation of the suspension could result in a game forfeit and will result in further sanctions against the Manager and Team. Please see the Disciplinary section of the HFA Rules of Play.

Many team managers are also registered as players (either on the team they manage or another team) and some are also registered as assistant managers on other club teams. Note that a manager who is suspended in his capacity as a player is still eligible to coach his team during his player suspension. Also note that a manager who is suspended in his capacity as a manager but who is also an assistant manager for another team cannot be at either his primary or his secondary team's games during his suspension.

2. When a player, team or manager is placed on ***probation*** any subsequent incident that causes the player, team or manager to come before the Disciplinary Committee during the probationary period will cause the actions of the previous incident to also be considered in the sanctions that are subsequently imposed.
